PROFILE

I have completed MERN stack training and enjoy building simple, user-friendly web applications. I am looking forward to starting my career and gaining real-world experience.

PROJECTS

Sabarmati Riverfront Website

- Designed and developed a responsive website for Sabarmati using HTML and CSS.
- Created clean layouts and user-friendly navigation.
- Focused on visual design, structure, and mobile responsiveness.
- Improved understanding of front-end development and real-world website design.

Lapinoz Menu Section

- Developed a dynamic menu section using React.js.
- Used map() function to display items efficiently and filter() for category-based filtering.
- Implemented React Router for smooth page navigation.
- Enhanced user experience with clean UI and responsive design.

React Learning Website

- Built an informative React-based website containing React interview questions, tasks, and learning resources.
- Designed the site to work like an educational platform, similar to online learning websites.
- Used React Router for smooth navigation between different sections.
- Focused on clean UI, structured content, and user-friendly experience.
